

Al-Mamun

FULL STACK DEVELOPER · FLUTTER/MOBILE (ANDROID, IOS) · NODE.JS · PYTHON/AI · AZURE

✉ thealmamun1@gmail.com ☎ +49 15750172244 📍 Dresden, Germany in linkedin/thealmamun
💻 github/thealmamun 🌐 thealmamun.com

Full Stack Developer with 4+ years of professional experience designing and delivering end-to-end software solutions spanning mobile, frontend, backend, and cloud. Owns products from Flutter clients (Android, iOS, Web) through Node.js/REST API backends to Azure and Google Cloud deployment. Native Android (Kotlin) and native iOS (Swift) expertise complements deep Flutter/Dart cross-platform skills. Brings hands-on AI engineering experience (LLMs, RAG, LangChain, FastAPI) from an M.Sc. thesis building a full LLM/RAG teaching assistant. Holds an M.Sc. in Web Engineering from Chemnitz University of Technology.

FULL STACK EXPERIENCE

Enloc AG, Dresden, Germany

May 2023 – Apr 2026

Software Engineer · Full-Time

- Delivered EN.Tab end-to-end — a digital property management platform — owning the Flutter frontend (Android, iOS) and integrating it against Node.js and C# backend services via REST APIs for clients across Germany.
- Architected offline-first real-time sync using local SQLite storage and cloud backend APIs, ensuring resilient data consistency for field users.
- Implemented native Java SDK integrations via Flutter platform channels, bridging Android-specific hardware and third-party SDKs into the shared architecture.
- Implemented a push notification system and automated workflow triggers spanning frontend events and backend services, reducing manual operations significantly.
- Owned the CI/CD pipeline via Fastlane and Azure DevOps, automating deployments to App Store and Google Play on Azure-hosted infrastructure.

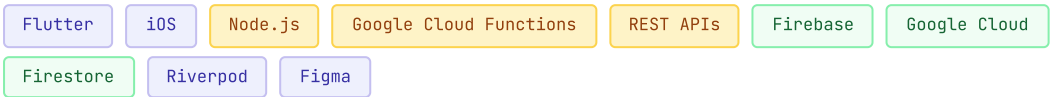

App-Concept GmbH, Germany

Oct 2021 – Apr 2023

Software Engineer · Werkstudent

- Delivered cross-platform Flutter apps (Android, iOS, Web) full stack — frontend through backend — for a variety of client projects across multiple industries.
- Built and scaled JobsNavi, a skill-based talent-matching platform, from prototype to live product, designing location/skill-matching logic across client and backend.
- Designed and implemented Google Cloud Functions (Node.js) serverless API endpoints, powering matching logic and data operations consumed by the Flutter frontend.
- Integrated Firebase (Auth, Firestore) and Google Cloud Storage across frontend and backend layers for secure, real-time multi-client architectures.
- Transformed Figma designs into pixel-perfect Flutter applications, owning the journey from UI handoff through backend integration to App Store deployment.

AI / LLM Application Development

2023 – Present

Personal & Academic Projects

- Built a full LLM + RAG system from scratch for the M.Sc. thesis "Learning Buddy: An On-Demand Personal AI Teaching Assistant" using LangChain, Python, and FastAPI — embeddings, vector-based retrieval, data preparation, and evaluation.
- Designed and exposed FastAPI backend endpoints serving RAG pipeline results, connecting retrieval/generation logic to a consuming frontend.
- Worked hands-on with the Model Context Protocol (MCP) for API and tool integration at the MCP Hands-on Dev Day, Dresden.
- Built a transformer-based (BERT) NLP model for a fake-news classification seminar project, covering data pipeline through evaluation.

Royex Technologies, Bangladesh (UAE-based)

Jul 2020 – Jan 2021

Jr. Software Engineer

- Built e-commerce frontend for Alaasaq in Flutter with Magento REST API integration — full client-to-backend data flow.
- Developed Swalifna live video streaming interface using Agora.io SDK with real-time signalling backend integration.
- Converted Adobe XD designs for Taddreb school management app into full Flutter frontend consuming REST backend services.

CERTIFICATIONS & TRAINING

MCP Hands-on: AI Agents & API Integration Workshop, Dev Day 2026, Dresden

May 2026

Hands-on workshop on the Model Context Protocol (MCP) for connecting LLMs to external tools and APIs.

Build with AI: Scaling Multi-Agent Apps Workshop, GDG, Google

May 2026

Practical workshop on designing and scaling multi-agent AI application architectures.

Microsoft Azure AI Essentials: Workloads & Machine Learning on Azure, LinkedIn Learning

2025

Core AI/ML workload concepts and services on the Microsoft Azure platform.

Google AI Professional Certificate, Coursera

2026

Applied AI/ML concepts, tools, and workflows across the Google AI ecosystem.

Android & iOS App Development with Flutter, BITM

2021

Cross-platform mobile app development for Android and iOS using the Flutter framework.

The Complete Flutter Bootcamp with Dart, Udemy

2020

Flutter & Dart fundamentals through advanced state management and app architecture.

EDUCATION

M.Sc. Web Engineering

2021 – 2026

Chemnitz University of Technology, Germany

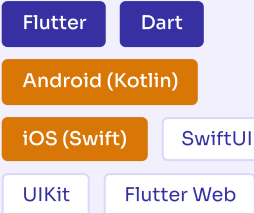

Thesis: "Learning Buddy: An On-Demand Personal AI Teaching Assistant" (LangChain, Python, FastAPI, RAG). Scalable software systems, distributed architectures, cloud engineering, full-stack web & mobile development, API design, AI-driven applications.

HIGHLIGHTS

4+ yrs shipping production apps
Mobile → Web → Backend → Cloud ownership
Native Android (Kotlin) & iOS (Swift) + Flutter
Hands-on AI/LLM & RAG engineering
EU Blue Card · no visa sponsorship needed
M.Sc. Web Engineering, TU Chemnitz

FULL STACK SKILLS

MOBILE & FRONTEND

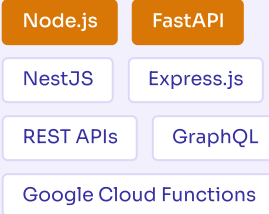

WEB FRONTEND

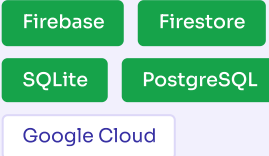

PROGRAMMING LANGUAGES

BACKEND & APIS

DATA & CLOUD

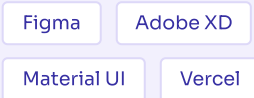

ARCHITECTURE & DEVOPS

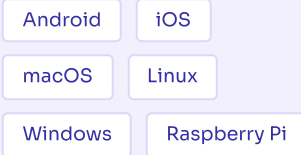

AI / EMERGING

UI / DESIGN & DEPLOYMENT

OPERATING SYSTEMS

LANGUAGES

English	C1
German	B1 → B2
Bengali	Native

TOOLS

Figma · Adobe XD · Postman
VS Code · Android Studio
Jira · Confluence · Agile
GitHub · GitLab · Fastlane

HOBBIES

Chess · Reading
Football · Cycling · Traveling
